FITTING GUIDE

TEMPERED GLASS GARMIN EDGE 540

0.5 mm tempered glass, oleophobic coating, full touch sensitivity. Fitting takes five minutes and only happens once: follow the order.

GARMIN EDGE 540 · TEMPERED GLASS 0.5 MM · OLEOPHOBIC

Before fitting

- A room with **no dust in the air**: the bathroom right after a shower is ideal.
- Washed hands, computer switched off, dry screen, room temperature.
- A microfibre cloth, a slightly damp wipe and a piece of adhesive tape to trap dust.

Fitting, step by step

1. **Clean the screen** with the damp wipe, then dry with the microfibre. Check against the light: no smear.
2. **Check the alignment.** Without removing the film, lay the glass on the screen: it sits inside the edges of the glass and clears the buttons.
3. **Peel the film** off the adhesive side, holding the glass by its edges. Do not touch the sticky side again.
4. **Lay it from the top.** Line up the top edge, then let the glass settle: adhesion spreads on its own within seconds.
5. **Push out the bubbles** from the centre to the edges with the microfibre. Small remaining bubbles clear within 24 h.

Specifications

Compatibility	**Garmin Edge 540**	Thickness	**0.5 mm**
Material	**Tempered glass**	Surface	**Oleophobic**
Touch	**Fully preserved**	Resists	**Scratches, impacts**

IF SOMETHING GOES WRONG

- **Trapped dust** (white dot with a halo): lift the nearest corner with the tape, pick the particle off with another piece of tape, lay it back down.
- **Misaligned glass**: lift it off entirely right away and start again from step 2.
- **Stubborn bubble** after 24 h: there is dust underneath, see the first point.

DON'T

- No fitting on a cracked screen or under a case already in place: the silicone case goes on after the glass. A glass cracked by an impact has done its job: replace it.
