FITTING GUIDE

FRENCH FLAG STICKERS, 4 DESIGNS

Four tricolour vinyl stickers, water and UV resistant, for a frame, a helmet, a seatpost or a scooter. Fitted in seconds, removed without a trace: only the preparation matters.

REF. STICKRFR · FRAMES, HELMETS, ACCESSORIES · ADHESIVE VINYL, 4 SIZES

Where each design goes

DESIGN	SIZE	PLACEMENT
Large V (left)	11 × 5.5 cm	Seat stays, wide tube, highly visible area
Medium V (right)	10.5 × 4 cm	Fork, chainstays, helmet, mudguard
Long strip	13.5 × 5 cm	Down tube, main frame
Short strip	10 × 2 cm	Seatpost, helmet, scooter

Holds on aluminium, carbon, steel and plastic. Avoid rub areas: shoes, bar tape, bags.

Fitting, step by step

1. **Clean the surface with alcohol** and let it dry. Nothing sticks to a waxed, greasy or dusty frame. Work at room temperature, not in a cold garage.
2. **Peel the backing** while holding the sticker by its edges, without touching the adhesive side.
3. **Position without pressing,** check the alignment with the tube, then press from the centre to the edges with a thumb or a plastic card.
4. **On a strongly curved tube,** warm gently with a hair dryer to soften the vinyl, then press the edges.
5. **Wait 24 h** before the first wash.

Specifications

Contents	**4 stickers**	Material	**Adhesive vinyl**
Colours	**Blue, white, red**	Resists	**Water, UV**

IF SOMETHING GOES WRONG

- **Crooked sticker**: lift it right away, before pressing, and lay it again.
- **Bubble**: prick it with a needle and push the air towards the hole.
- **Lifting edge**: surface not clean enough. Peel off, clean, refit.

REMOVING A STICKER

- Warm gently, lift a corner with a fingernail, pull slowly. Any adhesive left comes off with alcohol. Take care on paint that is already chipped.
