FITTING GUIDE

PRESTA VALVE RIM PROTECTION STICKERS

Two clear 2 × 2 cm discs to stick around the valve hole: the nut and the valve no longer scratch the rim. Invisible once fitted, 0.26 g for the pair.

REF. STICKVALV1 · PRESTA VALVES, ALL RIMS · CLEAR, 2 × 2 CM

Before fitting

- Wheel off or tyre deflated, **valve out** of the hole: the sticker goes on the outer face of the rim, where the valve nut bears.
- A cotton pad with alcohol, a dry cloth, clean hands: dust and grease are the adhesive's two enemies.
- Scissors if the rim is narrower than the sticker.

Fitting, step by step

1. **Clean the area around the hole** with the alcohol pad, then dry. No trace of sealant, mud or wax.
2. **Trim if needed.** Lay the sticker on dry, backing still on: if it overhangs the rim, cut it with scissors so it sits flat on the edge.
3. **Peel the backing** holding the disc by its edge, without touching the sticky side.
4. **Centre the opening on the valve hole** and lay it down in one go, then press for a few seconds with a fingertip, from the centre outwards.
5. **Fit the valve or the inner tube** as usual: the nut tightens onto the sticker, not the rim.

Specifications

Valve	**Presta**	Colour	**Clear**
Dimensions	**2 × 2 cm**	Weight	**≈ 0.26 g per pair**
Compatibility	**Road, gravel, MTB, cruiser, urban**	Contents	**Set of 2**

IF SOMETHING GOES WRONG

- **The sticker lifts**: greasy or damp surface at fitting. Remove it, clean with alcohol, fit a new one; it is a consumable, keep spares.
- **It is on crooked**: peel it off straight away and refit; once the nut is tightened on it, it no longer moves.
- **The valve will not go through**: the opening is not centred on the hole. Go back to step 4.

DON'T

- No fitting on a dirty rim, nor under tubeless rim tape: the sticker goes on the **outside** of the rim, under the nut. It does not replace a tubeless valve's seal and does not repair a damaged valve hole.
